in Student Aid

FIGURE 1. *Ten-Year Trend-Line of Aid Awarded to Postsecondary Students, 1989–1990 to 1999–2000*

2000

100
YEARS

INTRODUCTION

Trends in Student Aid presents annual data on the amount of financial assistance—grants, loans, and work-study—available to help students pay for postsecondary education. The College Board began this data series 15 years ago to track the value of such aid over time from federal, state, and institutional sources.

For the third consecutive year, we are releasing *Trends in Student Aid* along with a companion report entitled *Trends in College Pricing*. The latter presents data from the College Board's *Annual Survey of Colleges* on undergraduate charges for tuition, fees, room and board, and other estimated expenses of attending higher education in the current academic year. We believe it makes sense to publish these two survey reports together. One provides the latest information on how much college "costs"; the other tells how much and in what form aid is available to pay these expenses.

In both publications we report trend data in both constant (inflation adjusted for 1999–2000) and current dollars. The inflation adjustment promotes accurate interpretation of trends, controlling for the variable purchasing power of the dollar over time.

The objective of this report is to assemble the most complete, comparable, and reliable statistics on student financial aid. Tables 1 to 10 and Figures 1 to 9 provide a variety of data for the period 1989–1990 through 1999–2000. Appendix tables A and B provide basic program statistics for all years in our database back to 1963–1964, for those who wish to calculate trends over longer periods than described in this update. Appendix tables C and D provide disaggregated data for the Federal Family Education Loan Program (FFELP) and the Ford Direct Student Loan Program (FDSLPL).

To put financial aid trends in context, we also provide selected data from *Trends in College Pricing*, including changes in undergraduate tuition and fees, total costs of attendance, and incomes of families most likely to have children in college. To gauge the extent to which college is becoming more or less affordable, one must look at all three measures (price, family income, and available aid) together.

As always, we continue to refine our coverage of programs and update previously reported statistics when better data become available. Therefore, this update replaces previous *Trends in Student Aid* publications.

Limitations of the Data Collection

This survey covers only direct aid to students, not the indirect subsidies that make it possible for institutions to charge less than the actual costs of instruction. State, federal, and local appropriations, as well as private philanthropy to colleges and universities, reduce the prices faced by students in general. While states are the largest contributors of such indirect support, the federal government remains the largest provider of direct aid to help students meet their out-of-pocket expenses, including tuition, fees, living costs, transportation, books, and supplies.

The report does not consistently separate assistance for graduate and undergraduate students, since the available data are not broken out this way for many sources and programs. Likewise, we are unable to capture students' wages from employment that are not the result of formal work-study programs, nor do we attempt to estimate tuition assistance that students may receive from their employers.

Despite these limitations, the survey covers virtually all federal aid and the vast majority of state and institutional assistance available to students in postsecondary education. Figures for federally sponsored borrowing through the Ford Direct Student Loan Program (FDSLPL) and the Federal Family Education Loan Program (FFELP) are based on estimates provided by the U.S. Department of Education. The estimates for institutional aid are necessarily broad approximations, extrapolated from 1995–96 Institutional Postsecondary Education Data System (IPEDS) data from the Department of Education. The estimates for state aid are also approximations, based on our own survey of selected state agencies and cross-checking with data from the National Association of State Student Grant and Aid Programs (NASSGAP).

Ideally, we would present statistics on aid as well as income and costs of attendance by type of institution (public/private, two-year/four-year, proprietary). But data on incomes and aid (unlike data on pricing) are not systematically available by postsecondary sector.

Loan Trends and Coverage

The most prominent trend in student aid that this survey has tracked since the early 1980s has been the growing reliance on borrowing for higher education. Federal programs have largely fueled this trend. The federal government provides about 70 percent of direct aid to postsecondary students, and almost 60 percent of all aid is now in the form of loans.

Federal and State Roles

The federal government provides the lion's share of direct aid to students as described in this survey. Approximately three-quarters of the more than \$68 billion in available student aid during 1999–2000 was generated by federal appropriations or loan guarantees. The states, on the other hand, provide a substantially larger share of operating support for institutions of higher education, which is not covered by this survey. Overall, the federal government contributes less than 15 percent of revenues of colleges and universities, while state governments contribute almost 30 percent.

Starting four years ago, we broadened our data collection by adding an estimate of non-federally sponsored borrowing through “alternative” college loan programs. Private and state loan programs for students and parents began to grow in the 1980s as college prices outpaced inflation and federal aid failed to cover the difference. After Congress raised federal borrowing ceilings in 1992, the growth in demand for non-federal loans may have leveled off, but our annual poll of non-federal loan sponsors reflects a renewed surge in the market for alternative loans. For 1999–2000, we estimate that non-federal loan volume exceeded \$3.8 billion, up from \$2.9 billion a year earlier and \$1.3 billion four years ago.

This year’s estimate includes \$3.3 billion in private loans, and nearly \$500 million in state-sponsored borrowing, the latter financed either by state appropriations or tax-exempt bond issues. Over half of the privately sponsored loan volume is for graduate students, while the state-sponsored programs are directed primarily to undergraduates and their families. Interest rates and other terms of these loans vary widely.

Because of the multiple players involved in originating, insuring, and servicing private student loans, there may be some double counting of dollar volume in our poll. At the same time, we know that we have not captured all the activity in this burgeoning market. If anything, we suspect our estimate is on the low side. Privately sponsored student loans remain a small fraction of federal student loan volume, but the demand for alternative sources of credit financing is clearly growing, and is likely to continue to grow, especially so long as Congress keeps a lid on federal borrowing ceilings.

The non-federal volume estimates do not include credit card financing, conventional consumer loans, or home equity lines of credit. Many families and students use these forms of credit for postsecondary expenses, and recent media reports have spotlighted the growing student use (and abuse) of credit cards in particular. But we have found no way, even roughly, to estimate the extent of such residual borrowing.

Future Coverage

Two years ago a group of nationally recognized experts was convened to review this survey and suggest improvements. This group helped the College Board think through some of the conceptual and practical issues in the data collection, as postsecondary financing patterns grow more complex.

One issue that this group addressed was the treatment of the federal tuition tax breaks created by the Taxpayer Relief Act of 1997. These benefits took effect in 1998 and are estimated to cost the federal government \$12–15 billion in lost revenue annually once the law is fully phased in, by the year 2002. The advisory group suggested the possibility of a supplementary study on the tuition tax provisions, rather than attempting to include them in the annual data collection for *Trends in Student Aid*. Why? First, they constitute tax relief, not student aid, and the relief generally will come during tax season, not when tuition bills are due. Second,

data on use of the tax provisions are not likely to be timely or easily accessible. While *Trends in Student Aid* presents data on assistance available during the most recently completed academic year, the IRS may not be able to provide data on use of the tax breaks until two or three years after a given tax year—if at all. We await more information from both the IRS and the Department of Education before deciding whether and how to include tuition-tax benefits in future editions of this survey.

As always, we welcome reader comments and suggestions on ways to broaden the coverage and increase the usefulness of the *Trends in Student Aid* data series. Visit College Board on the Web at www.collegeboard.com for an electronic version of this document and the companion report *Trends in College Pricing 2000*.

Kathleen Payea, consultant, completed the data collection for this *Trends* update, working with Kathleen Little of the College and University Enrollment Services division of the College Board on the presentation of the data in the publication. Lawrence Gladieux served as consultant for the analysis.

Thanks to all those involved in the data collection and review for this publication, including state agency and special-aid program contacts, as well as the many experts from the U.S. Department of Education. We wish to offer special thanks to Maria Rojzman, Mary Miller, and Steve Carter at the Policy, Budget, and Analysis unit of the U.S. Department of Education for their invaluable expertise and support.

What’s Covered in This Survey

- Grants, loans, and work-study assistance explicitly intended to help students and families meet their out-of-pocket expenses for postsecondary education, including tuition, fees, living costs, transportation, books, and supplies.
- Virtually all such federal aid and the vast majority of state and institutional assistance available to students pursuing postsecondary education.

What’s Not

- Indirect subsidies, especially state operating support for public higher education, that make it possible for institutions to charge less than the actual costs of instruction.
- Student wages that are not the result of formal work-study programs.
- Employer-paid tuition assistance.
- Use of credit cards, consumer loans, or home equity lines of credit to finance postsecondary expenses.
- Tax incentives that benefit students and parents in saving and paying for higher education.

Total Aid

Available student aid topped \$68 billion in 1999–2000, an increase of 4 percent over the preceding year after adjusting for inflation. (Tables 1 and 2; Figure 1)

Ten-Year Trend

Over the past decade, total aid has increased by almost 90 percent in constant dollars. However, the growing reliance on loan programs was responsible for two-thirds of this increase. (Tables 1 and 2; Figure 1)

Loans vs. Grants

Loan aid has increased by 125 percent during the past decade in constant dollars, while grant aid has increased by 55 percent. Loans comprise 59 percent of total aid available to students, compared to 49 percent 10 years ago, and 41 percent in 1980–1981. Over the past quarter century, federal student aid has drifted from a grant-based to a loan-based system, producing a sea change in the way many students and families finance postsecondary education. (Table 6; Figure 5)

Unsubsidized Loans

Student use of the unsubsidized loan option, introduced in 1992–1993 and available to students regardless of need, continues to grow while borrowing in the subsidized loan program has leveled off. The latter is subsidized in that the government pays the interest while borrowers are enrolled, while for unsubsidized loans, in-school interest charges are added to the borrower's total cost. Unsubsidized borrowing, by students (Stafford Unsubsidized) as well as parents (PLUS), now accounts for more than \$17 billion, or 48 percent of federal education loan volume. (Tables 1, 2, and 4b; Figure 4)

Direct vs. Guaranteed Loans

The Ford Direct Student Loan Program (FDSLPL), in which students borrow directly from the federal government through the institutions they attend, competes with the Federal Family Education Loan Program (FFELP), in which students may choose to receive their loans from private lenders guaranteed by the government. The FDSLPL's share of loan volume was just over 30 percent in 1999–2000. (Tables 1, 2; Appendix C/D)

Parent Loans

Borrowing through the federal Parent Loans to Undergraduate Students (PLUS) program rose 6 percent in 1999–2000 after adjusting for inflation. Since 1992–1993, PLUS volume has increased by almost 150 percent. In 1999–2000 the average PLUS loan amount was \$6,769, up more than 70 percent compared to seven years ago, again adjusting for inflation. (Tables 2 and 4b)

Non-Federal Loans

Non-federal borrowing totaled \$3.8 billion in 1999–2000, up 30 percent over the previous year. While the amount of non-federal borrowing is small compared to the \$36 billion in federal education loans, large increases over the past four years reflect a growing interest in and reliance on alternative methods of paying for college. (Tables 1 and 2; Figure 2)

FIGURE 2. Estimated Student Aid by Source for Academic Year 1999–2000 (Current Dollars in Billions)

Pell Grants

Recent increases in Pell Grant appropriations have helped to stabilize the overall loan-grant balance in the aid system. Yet the maximum Pell, at \$3,125 in 1999–2000, remains far below the purchasing power it had two decades ago. Originally designed as the foundation for student aid packaging, the maximum Pell Grant now covers 39 percent of the average fixed costs (tuition and fees, room and board) at a four-year public college and only 15 percent at a private four-year college. (Tables 4a and 7; Figure 6)

State Grant Programs

While providing less than 6 percent of total student aid, state grant funding has increased by 58 percent during the past 10 years after adjusting for inflation. Federal matching through the LEAP (Leveraging Educational Assistance Partnership, formerly SSIG) program has been cut sharply in recent years, contributing only \$22 million to state need-based grant programs in 1999–2000. (Tables 1 and 2; Figure 2)

Institutional Aid

Institutional grants account for nearly 20 percent of total available aid. Since 1989–1990, the estimated amount of institutional grant assistance has more than doubled in constant-dollar value. (Figure 2; Table 2)

Affordability Gaps

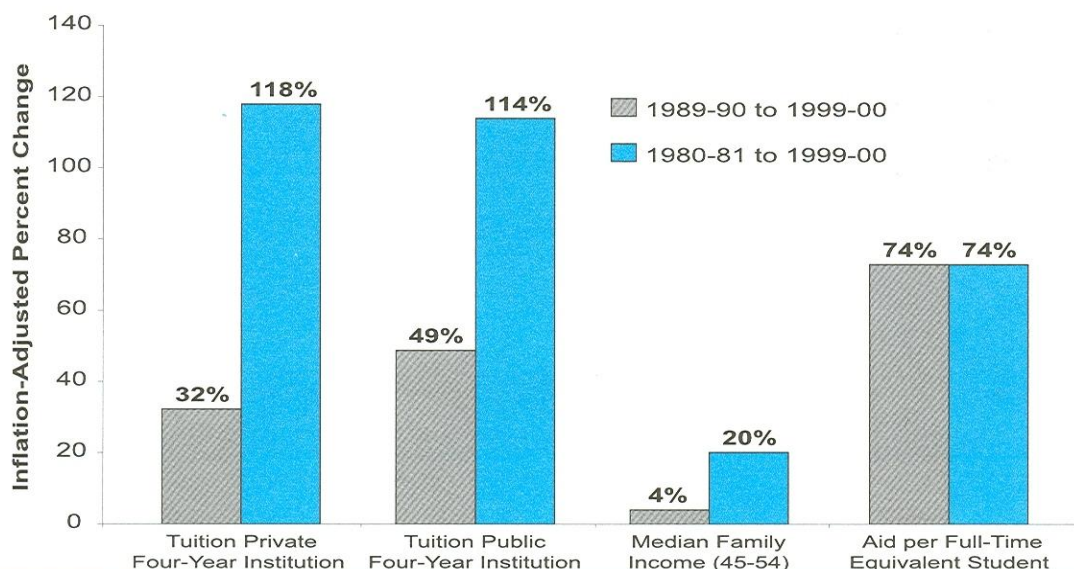

Tuition increases outpaced growth in personal and family income during the 1980s and 1990s. While inflation-adjusted tuition was essentially flat in the 1970s, average tuition at both public and private four-year institutions more than doubled from 1980 to 1999. At the same time, median income for families most likely to have children in college (parents aged 45–54) has been relatively stagnant, rising 20 percent since 1980. Median family income, however, tells only part of the story, because incomes steadily grew less equal during the 1980s and 1990s. The share of family income required to pay college costs has increased for many families, but it has gone up the most for those on the bottom rungs of the economic ladder. (Table 3; Figure 3; see also *Trends in College Pricing 2000*)

Over this same period, 1980–1999, aid per full-time equivalent (FTE) student increased in total value but did not keep pace with growth in tuition levels. Looking at the 10-year period, 1989–1999, growth in aid per FTE exceeded growth in tuition. However, this growth in aid came largely in the form of loans. (Table 8; Figure 7)

Need vs. Non-Need Aid

The proportion of federal aid that is awarded on the basis of need has been declining since the mid-1980s, primarily because of the growth in unsubsidized, non-need based borrowing. While need-based assistance accounted for about 80 percent of all federal aid a decade ago, it now accounts for less than 60 percent. (Table 9; Figure 8)

FIGURE 6. The Maximum Pell Grant as a Share of Cost of Attendance, 1973-1974 to 1999-2000

Note: Until 1986 the Higher Education Act limited the Pell Grant award to no more than 50% of a student's cost of attendance. That limit was increased to 60% from 1986 to 1992, and thereafter it was removed altogether.

Notes & Sources

TABLE 1
Federally Supported Programs

Several of the federally supported programs include small amounts of funding from sources other than the federal government. For example, Federal Work-Study (FWS) includes contributions by institutions, although most of the funds in the program are federal. Perkins Loans (until 1987 called National Direct Student Loans or NDSL) are funded from federal and institutional capital contributions as well as collections from borrowers.

Generally Available Aid

LEAP. Formerly known as the State Student Incentive Grant (SSIG) program, the Leveraging Educational Assistance Partnerships monies reported under federally supported aid include federal monies only; the state share is included under the "state grants" category. Likewise, institutional matching funds required by the Supplemental Educational Opportunity Grant (SEOG) program since 1989–1990 are reported under "institutional and other grants."

ICL. The Income Contingent Loan Program was discontinued after 1992–1993.

FDSL. The Ford Direct Loan Program began disbursing loans in academic year 1994–1995. It includes Stafford Subsidized and Unsubsidized Loans and Parent Loans for Undergraduate Students (PLUS). Under this program, loans are provided directly to students by the federal government, using funds from the U.S. Treasury. Data for the 1999–2000 year are estimates based on preliminary calculations from the Policy, Budget, and Analysis Staff, U.S. Department of Education.

FFELP. The Federal Family Education Loan Program (until 1992 Guaranteed Student Loans), which includes Stafford Subsidized, Unsubsidized, and PLUS loans (also included Supplemental Loans for Students, SLS, until 1994–1995), relies on private sources of capital. The federal government subsidizes interest payments and guarantees repayment of defaulted loans. Until SLS was created by the 1986 Amendments to the Higher Education Act, supplemental loans were provided to students under the Auxiliary Loans to Assist Students (ALAS) program. The SLS program was discontinued after the 1994–1995 academic year.

Specially Directed Aid

Veterans. Benefits are payments for postsecondary education and training to veterans and their dependents authorized under Chapters 30, 31, 32, 34, 35, and 106 of the U.S. Code. Federal contributions to Chapter 34, the Veterans' Educational Assistance portion of the Post-Korean Conflict Educational Assistance Programs, were terminated in 1990. After 1990, remaining eligible veterans were funded through Chapter 30.

Military. Expenditures for education are reported for three types of programs: the

F. Edward Hebert Armed Forces Health Profession Scholarship Program, Reserve Officers' Training Corps programs for the Air Force, Army, and Navy/Marines, and higher education tuition assistance for the active duty Armed Forces.

Other Grants. Includes Higher Education Grants for Indian Students, Fellowships for Indian Students (last funded in 1995–1996), American Indian Scholarships, Indian Health Service Scholarships, National Science Foundation predoctoral fellowships (minority and general graduate), National Health Service Corps Scholarships, National Institutes of Health predoctoral individual awards, including Nursing Fellowships (Nursing funding ended in 1984–1985), fellowships awarded through the Council on Legal Educational Opportunity (last funded in 1995–1996), the Jacob K. Javits Fellowship Program, the Robert C. Byrd Honors Scholarship Program (last funded in 1994–1995), and college grants provided to volunteers in the Americorps national service programs (funding began in 1994–1995).

Other Loans. Includes amounts loaned under the Health Professions Student Loan Program, the Health Education Assistance Loan Program, and the Nursing Student Loan Program.

State Grant Programs

The state grant amount for 1999–2000 is based on projections by the 20 states that award approximately 90 percent of state grant funds and estimates for the remaining 30 states and the District of Columbia made by the College Board. Previous data is updated using the NASS-GAP Annual Survey.

Non-Federal Loans

Estimates based on an informal College Board poll of the largest non-federal loan sponsors; includes estimates of private and state-sponsored volume for the past four years. Table 1 includes data from more private loan sources than in prior years.

Institutional and Other Grants

Institutional awards include, in addition to awards from the institution's own funds, scholarships, fellowships, and trainee stipends from government and private programs that allow the institution to select the recipient. Data since 1996–1997 are estimates based on 1995–1996 IPEDS data.

TABLE 2

Constant dollar figures are based on data from Table 1. See page 23 for a more complete explanation of constant-dollar conversions.

TABLE 3

Cost of attendance data are from the College Board's *Annual Survey of Colleges*, and include tuition, fees, and on-campus room and board costs. Because community colleges generally do not offer on-campus housing, cost of attendance figures are not reported for these institutions. Note that cost of attendance and tuition averages apply to undergraduate costs only, and are weighted by enrollment to reflect average costs to the student rather than average charges by the institution. Tuition is based on 30 semes-

ter or 45 quarter hours; room and board figures are for the academic year and assume double occupancy in a dormitory room and the maximum meal plan.

Income data are for the calendar year in which the academic year begins. Disposable personal income, median family, and household income data for the 1999–2000 year are estimated figures.

TABLE 4

The number of recipients of LEAP and state grants and the average award include only undergraduate recipients of each state's primary need-based programs. Comparable figures for 1999–2000 are not available.

1992–1993 is the first year of the Stafford Unsubsidized program. 1994–1995 is the last year of the SLS program. Through coincidence only, 1994–1995 was also the first year loans were made by the Ford Direct Loan Program.

The numbers of loans in SLS and PLUS programs in 1985–1986 had to be estimated from fiscal year data.

TABLE 5

"Four-year" institutions include nonprofit institutions offering Bachelor's and/or graduate degrees. "Two-year" institutions include nonprofit institutions of any other program length from six months to three years. "Proprietary" refers to private for-profit institutions.

The Stafford Unsubsidized Loan program first began disbursing funds in 1992–1993. Beginning in 1994–1995, loan distribution figures include Stafford Subsidized, Stafford Unsubsidized, and PLUS loans made through both the Federal Family Education Loan Program and the Ford Direct Loan Program.

TABLE 6

Based on data from Tables 1 and 2. The "grants" category includes Pell Grants, SEOG, LEAP, Veterans Benefits, Military Expenditures, Other Grants, State Grant Programs, and Institutional and Other Grants. "Loans" includes all remaining programs except FWS, which makes up the "work" component.

TABLE 7

The 1992 reauthorization of the Higher Education Act eliminated the percent cap on college costs beginning in 1993–1994. The constant dollar values reflect a fiscal year CPI adjustment.

TABLE 8

FTE data from Table 203, *Digest of Education Statistics 1999*. FTE data is for fall enrollment, all institutions.

TABLE 9

Based on data from Tables 1 and 2. Need-based aid includes Pell, SEOG, LEAP, FWS, Perkins, ICL, FDSL Subsidized, and FFEL Subsidized. Non-need based aid includes FDSL Unsub and PLUS, FFEL Unsub, PLUS, and SLS and all specially directed aid.

TABLE 10

Data from the U.S. Department of Education Budget reports, unpublished.

Appendix A

Figures on military-related aid are not precisely comparable to Table 1. Armed Forces tuition assistance amounts are not available for these years, and some ROTC data are estimated. See notes to Table 1 for further details.

Appendix B

Constant dollar figures are based on data in Appendix A. For an explanation of constant dollar conversions, see details in the following column.

FIGURES 1 AND 2

Based on Tables 1 and 2.

Academic Year 99 = 1999–2000

“Federal Campus Based” aid includes SEOG, FWS, and Perkins Loans.

“Federal Loans” includes Federal Family Education Loans and Ford Direct Loans. “Other Federal Programs” includes LEAP, Military and Veterans’ aid, Other Grants, and Other Loans.

FIGURE 3

Based on data from Tables 2, 3, and 8.

Median family income data for the 45–54 age category is used because it is more representative of families with dependents in college. This statistic is not representative of independent students.

FIGURE 4

Based on data from Table 2.

FIGURE 5

Based on Table 6 data and College Board historical data not printed in this publication.

“Loans” include FFELP, FDSLP, Perkins Loans, ICL, other federal loans, and non-federal loans as surveyed for this report.

“Grants” include Pell, SEOG, LEAP, Veterans grants, Military grants, State grants, Institutional and other grants, and miscellaneous grants.

“Work” includes Federal Work-Study (FWS).

FIGURE 6

Based on Tables 3 and 7, and historical cost of attendance data from the College Board (1987–1988 on) and the National Center for Education Statistics (pre-1987–1988).

FIGURE 7

Based on Table 8.

FIGURE 8

Based on Table 9.

FIGURE 9

Based on Table 2 and Appendix B.

Acronyms

FWS	=	Federal Work-Study
FFELP	=	Federal Family Education Loan Program
ICL	=	Income Contingent Loan Program
FDSLP	=	William D. Ford Direct Student
PLUS	=	Parent Loans to Undergraduate Students
SEOG	=	Federal Supplemental Educational Opportunity Grant
SLS	=	Supplemental Loans for Students
LEAP	=	Leveraging Educational Assistance Partnerships

Definitions

Academic year: July 1 to June 30

Federal fiscal year: October 1 to September 30

General Notes

- Details may not add to totals due to rounding.
- Aid is reported by the academic year in which it is awarded. When necessary, fiscal year data are converted to the academic year equivalents by reassigning the July through September expenditures.
- For a more detailed description of the programs and past trends, see *Trends in Student Aid: 1963 to 1983*.

A Note on Constant Dollar Conversion

The Consumer Price Index for all urban dwellers (the CPI-U) is used to adjust for inflation. Updated CPI data are available from the Bureau of Labor Statistics Web site (<http://stats.bls.gov/cpihome.htm>). This year, due to the availability of federal data by academic-year rather than the federal fiscal-year, we used an academic base-year calculation in most cases. The academic base year for 1999–2000 was calculated using CPI data for the months inclusive of July 1999 to June 2000.

Formula for Constant Dollar Conversion

$$\text{CONSTANT (base year) Dollars} = \text{CURRENT year dollars} \times \frac{\text{CPI for the base year}}{\text{CPI for the current year}}$$

Consumer Price Indexes: (1982–84=100)

Academic Year			Calendar Year		
Year	CPI	Factor	Year	CPI	Factor
1989–90	127.0	1.3314	1989	124.0	1.3423
1990–91	133.9	1.2624	1990	130.7	1.2736
1991–92	138.2	1.2232	1991	136.2	1.2218
1992–93	142.5	1.1862	1992	140.3	1.1859
1993–94	146.2	1.1562	1993	144.5	1.1519
1994–95	150.4	1.1240	1994	148.2	1.1226
1995–96	154.5	1.0942	1995	152.4	1.0920
1996–97	158.9	1.0639	1996	156.9	1.0609
1997–98	161.7	1.0452	1997	160.5	1.0367
1998–99	164.4	1.0283	1998	162.9	1.0217
1999–00	169.1	1.0000	1999	166.4	1.0000

The above table provides academic and calendar year CPI data. The factor column provides the user with a multiplication factor equal to that of CPI (base year) divided by CPI (current year), as illustrated in the right-hand side of the above equation. A simple multiplication of the current year figure by the associated factor will yield a constant-dollar result.

The Consumer Price Index (CPI) for current and past years is from the Bureau of Labor Statistics, U.S. Department of Labor.

Tables 1, 2, 4, 5, 6, 7, 8, & 9:

Campus-Based Aid (FWS, Perkins, and SEOG) U.S. Department of Education, Office of Postsecondary Education Policy, Budget, and Analysis Staff. *Federal Campus-Based Programs Databook 2000 and Federal Campus-Based Programs Distribution of Awards Annual*.

Federal Family Education Loan and Ford Direct Loan Programs

Unpublished data from the U.S. Department of Education, Policy, Budget, and Analysis Staff.

Institutional and Other Aid

1996–1997 to 1999–2000: estimated by the College Board. 1987–1988 to 1995–1996: unpublished IPEDS data from the National Center for Education Statistics.

Military

F. Edward Hebert Armed Forces Health Profession Scholarship amounts were obtained from the Office of the Assistant Secretary for Defense (Health Affairs). ROTC program data were obtained separately from the Air Force, Army, and Navy program offices. The Education Policy Directorate of the Office of the Secretary of Defense provided Armed Forces tuition assistance amounts.

Other Grants and Loans

The data were collected through conversations and correspondence with the officials of the agencies that sponsor the programs.

Pell Grant Program

Unpublished data from Policy, Budget, and Analysis Staff, U.S. Department of Education. Other data from Pell Grant End of Year Reports.

LEAP and State Grant Programs.

1999–2000: Preliminary figures reported by 20 states with largest grant appropriations. Figures for remaining 30 states, the District of Columbia, and Puerto Rico were estimated by the College Board.

1988–1989 to 1998–1999: 20th through 30th Annual Survey Reports of the National Association of State Scholarship and Grant Programs.

Veterans Benefits

Benefits Program series (annual publication for each fiscal year), Office of Budget and Finance, U.S. Veterans Administration and unpublished data from the same agency.

Table 3:

Cost of Attendance Data

The College Board’s *Annual Survey of Colleges*.

Income Data

Median Family and Household Income from the U.S. Department of Commerce, Economics and Statistics Administration, Bureau of Economic Analysis (www.census.gov/hhes/income/).

Trends in Student Aid

This report provides the most recent and complete statistics available on student aid in the 1980s and 1990s, complementing the publication by Gillespie and Carlson, *Trends in Student Aid: 1963 to 1983* (New York: The College Board, 1983) and replacing previously published updates. It revises figures presented earlier for the 1990s and provides estimates for academic year 1999–2000.

The College Board is grateful to the many staff members in public and private agencies who contributed the basic data, as well as their insights and expertise.

100
YEARS

The Washington Office of the College Board conducts research relevant to public policy issues in education. The office is located at 1233 20th Street, NW, Suite 600, Washington, DC 20036. Phone 202 822-5900.

Additional copies of this report, item #989898, may be ordered for \$12.00 each from College Board Publications, Box 886, New York, NY 10101-0886. Please add \$4.00 for postage and handling. Credit card orders may be placed by calling 800 323-7155 Monday through Friday, 8 a.m. to 11 p.m. (EST). For additional information call College Board Publications Customer Service at 212 713-8165 Monday through Friday, 9 a.m. to 5 p.m. (EST). Purchase orders over \$25.00 are accepted.
